

Abstract Submission: Primary Track and Primary Topical Area

Presenting authors must select a primary track and primary topical area with which the abstract should be associated. Only one track and topical area can be selected. Please consider submitting your abstract even if you believe it does not fit precisely into one of the options available. Abstracts will be reviewed and an abstract's track and/or topical area may be adjusted to group like abstracts together for presentation.

Leaders from ASN's Research Interest Sections and Councils will use the topical areas and keywords (more information below) to program abstracts. Primary tracks and primary topical areas are listed below.

Primary Track

- Cellular and Physiological Nutrition/Metabolism
- Clinical and Translational Nutrition
- Global and Public Health Nutrition
- Population Science
- Food Systems
- Career/Professional Development

Primary Topical Area

- Aging and Chronic Disease
- Carotenoids and Retinoids
- Climate/Environment, Agriculture and Food Supply
- Community and Public Health Nutrition
- Diet and Cancer
- Dietary Bioactive Components
- Dietary Patterns
- Eating Frequency and Chrononutrition
- Education and Teaching
- Energy and Macronutrient Metabolism
- Experimental Animal Nutrition
- Food Choice, Markets and Policy
- Food Science and Nutrition (includes food composition, formulation and processing)
- Global Nutrition
- Maternal, Perinatal and Pediatric Nutrition
- Medical Nutrition/Case Study Vignettes
- Neuroscience/Nutrition and the Brain
- Nutrient-Gene Interactions
- Nutrition Education and Behavioral Science
- Nutrition Translation and Communications
- Nutritional Epidemiology
- Nutritional Immunology and Inflammation/Immunometabolism
- Nutritional Microbiology/Microbiome
- Obesity
- Policies and Regulations
- Sports Nutrition and Physical Activity
- Vitamins and Minerals
- Methods
- Protocols
- Other
